**SKILL ENHANCEMENT PROGRAM FOR 3RD SEM MECHANICAL ENGG STUDENTS
ON 30TH NOVEMBER 2022**

Skill Enhancement Program Photos

Students from 3rd semester Mechanical Engineering were assigned a task to prepare any models using any waste materials under the theme of Waste to Wealth in Material Science and Engineering course. All students were participated and prepared individual prototype models on various Engineering applications using waste materials without spending any amount. A small expo was conducted to showcase the fabricated models to staff and students of RVITM. Principal has

attended and impressed on students' performance. HoD and many faculty members have given good feedback about the event and encouraged the students by providing their technical suggestions. The idea is to motivate students to enhance their skills in the development of products from scratch to finished products in Materials Science field.

This concept was initiated and implemented by Dr. Durga Prasad C, faculty coordinator for the said course. Overall students were enjoyed and learnt many concepts in this field.
