

Outreach Activity | CSE Department, RVITM

As part of the Outreach Initiative of the Department of Computer Science & Engineering, RV Institute of Technology & Management (RVITM), Mrs. Priyanka K R, Dr. Annie Sujith, Mr. Manjunath K M, and Ms. Indu K S visited the Government Primary School, Chikkalasandra on Friday, 17th July 2026.

The team received a heartfelt welcome from the Headmistress, teachers, and the enthusiastic young students, setting the tone for a memorable and meaningful day.

The outreach began with the distribution of stationery kits to the children, followed by an interactive session on the Basics of Computers, designed to introduce them to fundamental digital concepts in an engaging manner.

To reinforce their learning, a fun quiz was conducted, and the students who answered confidently were appreciated with chocolates, bringing smiles and excitement to the classroom.

The children then enthusiastically participated in a series of Brain and IQ Activities, showcasing their curiosity, creativity, and problem-solving abilities. A lively brain-break dance session added energy and joy to the day, with the children happily joining in and enjoying every moment.

The programme concluded with a collaborative Word Search Team-Building Activity, encouraging teamwork, communication, and critical thinking among the students.

The visit was a truly enriching experience for both the faculty members and the children. Witnessing the eagerness to learn, the enthusiasm to participate, and the bright smiles of the young minds reaffirmed our commitment to creating meaningful learning experiences beyond the classroom.

Together, we inspire. Together, we learn. Together, we build a brighter future.
